Altitude Mirrors

Nestled in the heart of the Alps, altitude lakes reflect the highest peaks. When these natural mirrors freeze during a magical moment they reveal us the beauty and the soul of the mountains.

The author has walked during several decades through the French, Swiss, Italian and Austrian ranges of mountains, from Ecrins to Groglockner via Mont-Blanc and the crown of the Swiss 4000m. He invites you to discover the most beautiful altitude mirrors, sometimes hidden in secret places, and the natural resources of the surrounding regions.

Beautiful large format book (32x28 cm), high quality print, 240 pages, 400 photos, GPS coordinates of the lakes.
